HANDS-ON ELEMENTS

Your students are unique individuals with their own ways of seeing the world and these schools are the same way! All tours will incorporate the same material, but each school has customized the curriculum to fit its campus—complete with its own hands-on element for your students to try!

BROOKS YOU ARE THE FOCUS

See how far photography has come! Students will trace the medium's history in a hands-on environment that will instill in them a greater appreciation for the tiny camera in their cell phone.

HARRINGTON REAL WEB WORKSHOP

The web isn't just on your computer screen anymore! Give your students the opportunity to design their own mobile app using cross-platform technology.

IADT & COLLINS DESIGN YOUR YOU

Everywhere they go, students are surrounded by graphic design. Now they can learn the principles of design and use the latest equipment to create a logo that best captures their unique identity.

Created for students who see the world differently.

Times have changed and students crave customization. Footwear, mobile apps, social media, everything is personal. College should be the same way!

For the students who want to tell you what typeface works best or which wall should come down, we've created unique programming that is tailor-made for the way they learn.

What differentiates this program from others?

- Aligns with STEM
- Hands-on elements
- Transportation available
- Convenient and free
- Cutting edge facilities
- Satellite tours available

student messaging

There's nothing normal or average about you. You're one of a kind and you deserve an education that's more than one size fits all.

*Look at what you did in an hour.
Now imagine what you could achieve in a lifetime.*

campaign messaging

*REAL life.
REAL innovation.
REAL experience.*

*Because you see the
world differently.*
